

# URBAN FLAME

## Urban Flame bio-ethanol fireplaces Creative variations around the fire

We recognize an innovative concept by its simplicity. The urban flame fireplace is obvious. Innovative. Fascinating. The ideal fireplace. Environmentally friendly.

**An original concept. A fireplace without smoke. No flue. Uses bio-ethanol.**

The fireplace can be used anywhere, in a loft, a house, a small flat, bars, restaurants, hotels, and showrooms. The urban flame fireplace uses bio-ethanol, a renewable fuel. Without smoke. Without soot. Thus without flue. No maintenance. Easy to start and to shut down. No risk of sparks. 100% mobile.

**A creative fire.**

An open fireplace. The modules have a contemporary design. Assembly and fixing is simple. Practical and efficient.

**We have received comments on the Urban Flame from 3 fireplace lovers.**

Discover their creative and personal views of domestic fire.

“Once a year, I change the interior decoration and the layout of my flat. Therefore, with the mobility of the Urban Flame, I can continually enjoy the fireplace.”

François S. Architect in Paris

## URBAN FLAME

The Urban Flame fireplaces, ground or mural, are made of high gloss lacquered cubic modules with a discrete design to give value to the flame.

### Fireplace components

#### The heart (burner box and burner)

The burner box is made of fire proof MDF timber and fireproof paint. The burner unit is made from 4mm stainless steel and laser cut to perfection.  
Dimensions: L50 X W25 X H12 cm or L70 X W25 X H12 cm.

Two fins are integrated in the heart of the tank to stabilize the flame. The dimensions of the hole where the flame comes out and the dimensions of its adjusting plate are specially designed and made to get a stylish flame. The adjusting tongs enable you to modify the flame's intensity. The stainless steel burner has a 3 litre tank. On a medium setting the fuel consumption is 1/2 litre per hour.

#### The columns

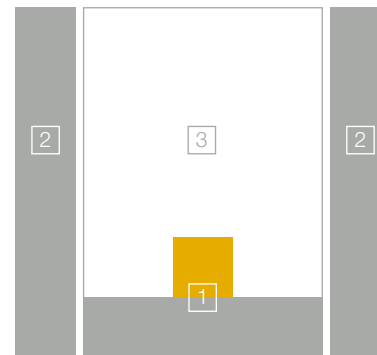

The columns form the vertical posts of your fireplace. They are made of fire proof MDF timber.  
Dimensions: L15 X W25 X H50 cm or L15 X W25 X H70 cm.  
Surface: High gloss lacquered coating.

#### Glass panels

Back glass panels: They protect the walls against the flame. They are made with clear or black tempered glass.

## URBAN FLAME, ENVIRONMENTALLY FRIENDLY, NO POLLUTION, ABSOLUTE SERENITY.

Enjoy a pleasant evening with family and friends. The Urban Flame fireplace does not pollute the environment.

### An environmentally friendly fireplace.

The Urban Flame is fuelled by a green energy called Denatured Ethanol. Ethanol is a pure form of alcohol which is produced from the fermentation of sugars originating from agricultural crops, such as sugar cane, potatoes, and grain. In order to comply with various regulations, all alcohol not-for-consumption must be denatured to render it undrinkable. Ethanol producers de-nature ethanol with various substances for re-sale purposes and it is then called Denatured Ethanol.

### Your environment.

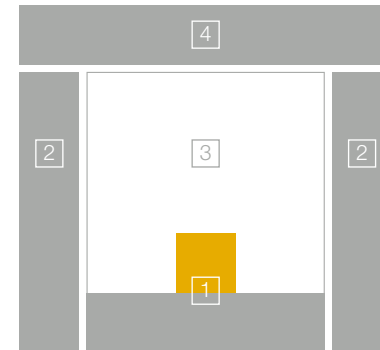

The combustion of Ethanol produces heat, water vapour, and a small amount of carbon dioxide (The same amount of carbon dioxide as few candles). There is no soot and no deposits. All emissions are within a safe standard for flueless fireplaces. The surrounding air remains healthy for everyone, the people, the animals and the plants.

### A fire you can control.

The flame intensity is adjustable to avoid any danger.

### A noticeable heater.

The Urban Flame fireplace can stand alone as a heater producing about the same heat as a 2 kw fireplace. The fireplace, on average, can heat a room up to 28sqm.

### O50

1. Burner box – 50 cm.
2. Columns – 70 cm.
3. Glass panel.
4. Stainless top – 80 cm.

2. Columns – 70 cm.
3. Glass panel.
4. Stainless top – 100 cm.

“At home, it’s everyone around my fireplace. So tonight,  
I turn on the camp fire... my friends love it”

Frédérique G. Stylist in Paris.

A modern living room with a white fireplace, a man reading a book, and large windows. The room features a white fireplace with a black hearth and a white mantel. A man in a light blue shirt and dark jeans is standing in front of the fireplace, reading a book. The room has large windows, including a large arched window and a set of glass doors leading to a balcony. There is a black leather sofa, a coffee table, and various decorative items like a sculpture and a painting.

“My fireplace, a good book and it is an escape  
accessible at any time”

Jean-Marc C. Sales Director in Nantes.

THE IDEAL FIREPLACE, ACCESSIBLE TO ANYONE, PRACTICAL,  
AND CAN BE PLACED ANYWHERE.

**Your choice**

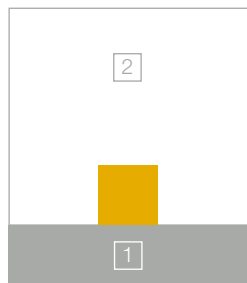

There are various styles available, in three different colours: black, white and taupe.

**Bio-ethanol is easy to carry**

Bio-ethanol is 5 times less heavy than wood, takes up less space and is cost effective.

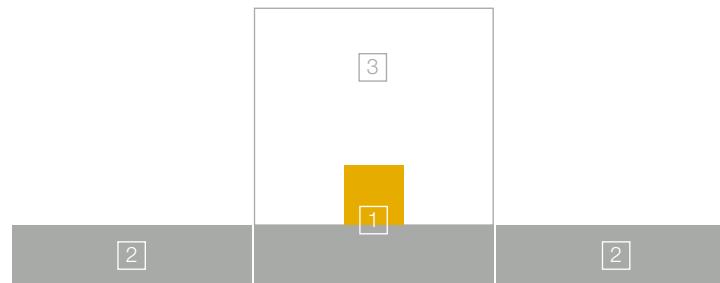

There is no reason to deprive oneself of a fireplace: accessible price, practical fuel, no maintenance.

Everyone has the right to have an inside flame.

## Specification

Heavy duty burner units	4 mm stainless steel, laser cut to perfection
Burner box and columns	Fireproof MDF timber with high-gloss, laquered coating
Fuel type	Denatured Ethanol (also called Methylated Spirits, Spirits, Denatured Alcohol, Brenn Spirits)
Efficiency	Over 90%
Heat produced	Equal to a 2kw fireplace
Heating capacity	28m <sup>2</sup> room
Fuel consumption	0.5 litre/hour on medium setting
Fuel reservoir capacity	3 litres

## Advantages

- Environmentally friendly
- Easy to install
- Easy to move around
- Efficient heat produced
- No smell
- No soot
- No flue
- No maintenance
- Regulate the flame
- Turn the flame on or off any time
